Our Approach....

At **David Hyde and Associates** we focus on three key priorities entering into each new client project:

Business Objective(s)

We gain a clear idea of what the client needs to protect; its' tangible and intangible assets, operating footprint, human capital needs, and critical business functions.

Risk Profile

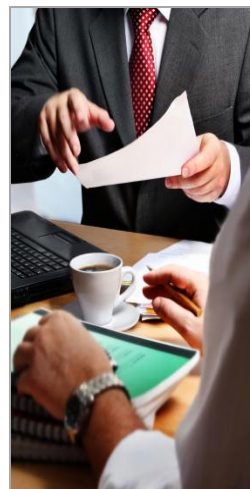

We focus on clients' legal and regulatory requirements, sector- and/or industry-specific risks, malevolent threats, and natural/accidental hazards.

Required Outcome

Our consulting team delivers consistent results, enabling clients to manage risk in a cost effective manner proportionate to their overall risk exposure.

Our team has been involved in the design, review and implementation of Security, Crisis and Business Continuity Management programs at some of Canada's highest profile landmarks. Our experience ensures that our clients can reduce overall exposure to risk and optimize return on their total security investment.

At **David Hyde and Associates** we understand today's harsh business realities. Our associates have held senior leadership roles within major corporations; led complex operations; built industry-leading teams; managed budgets; and responded to many of those 3:00 am crises!

The knowledge and experience of our multi-disciplinary team allows us to offer consulting and training services across many business and industry sectors.

Please call us today to discover how we can help to address your security and protection needs.
