#### Training

Business & workplace crime prevention training

### We Can Help....

Crime remains a primary business risk for many organizations. There are compelling reasons to focus on crime prevention. Crime has the potential to cause serious harm to staff, not to mention financial losses arising from property damage, legal liability and harm to reputation.

Organizations are under a legal duty of care to take reasonable steps to mitigate the risk of crime across their business operations. Even a cursory scan of media sources demonstrates the fact that crime does not discriminate - it can occur anywhere - at any time - sometimes with devastating results.

The **David Hyde & Associates** team specialize in business and workplace crime prevention. We have been involved in the design, review and development of crime prevention programs at some of Canada's highest profile landmarks.

Our experience equips us with the tools and abilities to ensure our clients can reduce overall risk exposure and optimize return on their security investment.

## We Optimize Crime Prevention....

Research suggests that crime is facilitated or inhibited by three key factors:

### Type and Motivation of Offender

Different types of offender select different crime targets. We identify the types of criminal most likely to target your business and help to focus your crime prevention efforts.

### Target Attractiveness

Criminals seek targets that afford high yield at low risk. We adopt the offender's view, identifying crime facilitators and adapting the managed environment to prevent crime.

### Level of Guardianship

Guardianship is what the offender sees standing in the way of his or her crime. We can help you integrate all elements of crime prevention into an effective, manageable solution.

The crime prevention through environmental design (CPTED) and other proven crime control methods used by **David Hyde & Associates** are aimed at making crime more risky and less rewarding to the offender.

Our crime prevention model incorporates:

1. **Threat assessment** to identify the offenders most likely to target the location(s) under review
2. **Vulnerability assessment** to gauge the adequacy of existing crime control measures
3. **Risk management decision** to reduce, transfer, avoid or tolerate the identified crime risks
4. **Action** to mitigate the identified crime risks

The **David Hyde & Associates** team has provided crime prevention solutions to some of Canada's largest corporations.

Please call today to find out how we can help to optimize your crime prevention program.
